P. S.—I grow my own plants. I exercise the greatest care to keep my varieties true to name and hold myself in readiness at all times to replace on proper proof, all stock that may prove otherwise, but it is mutually agreed between the purchaser and myself that I shall not be liable for any amount greater than the original price.

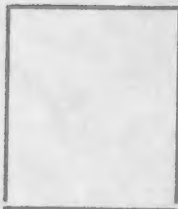

The Tennessee Beauty

This plant is related to the Blakemore, and will stand up under long distance shipping and freezing. They fruit about two weeks later than the Blakemore and will prolong the picking season about two weeks. The yield per acre is greater than Blakemore. The fruit is larger and has a deeper color, having an excellent flavor, similar to but better than the Blakemore.

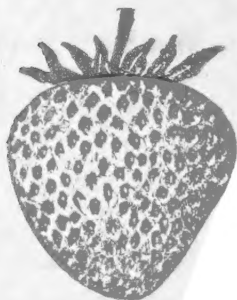

We Guarantee That These Plants Have Been Grown On New Ground

We grow these plants on acreage cleared and prepared for planting especially for strawberry plants. We never replant this acreage to strawberry plants the second year and will give an absolute guarantee of new ground grown strawberry plants.
